

Did You Know?

An **OZONE ACTION DAY NOTICE** is issued when air & weather conditions can lead to lots of ground-level ozone or smog.

Formula for an Ozone Action Day

A 90° or above day + little or no wind + no clouds in the sky + no changes in the weather forecasted = **Ozone Action Day**

Your parents may use oil-based paints and chemicals that make your house look nice. But many of these products add to the air pollution problem. Ask your parents to limit their use of those products that have harmful chemicals.

Cars are one of the biggest causes of smog. Many people drive old or un-tuned cars that don't burn all of their fuel. This causes a lot of air pollution.

Setting your air conditioner too low is a big waste of energy and adds to the smog problem. During the summer, it's best to leave it at 74°.

Lawn mowers, chain saws, and other power tools with gasoline-powered engines make smog. Use these after 6:00 pm.

Some Causes of Bad Ozone
