

Remember ... your actions make the difference.

Remind your parents that a well-tuned car gets better gas mileage and doesn't cause as much pollution.

Have your parents run all errands at the same time (go to the bank, dry cleaners and grocery). It cuts down on the pollution their car puts into the air, and it will also save them money on gas!

Taking public transportation (like a bus) cuts down the number of vehicles causing pollution.

Wait until after 6:00 pm to mow the lawn. Remind your parents, gasoline-powered engines make more smog when the sun is hot and bright.
