

Local Plan Health Assessment

PLAN4Health – Miami Valley

PLAN4Health – Miami Valley

PLAN4Health – Miami Valley is a multiyear initiative which aims to;

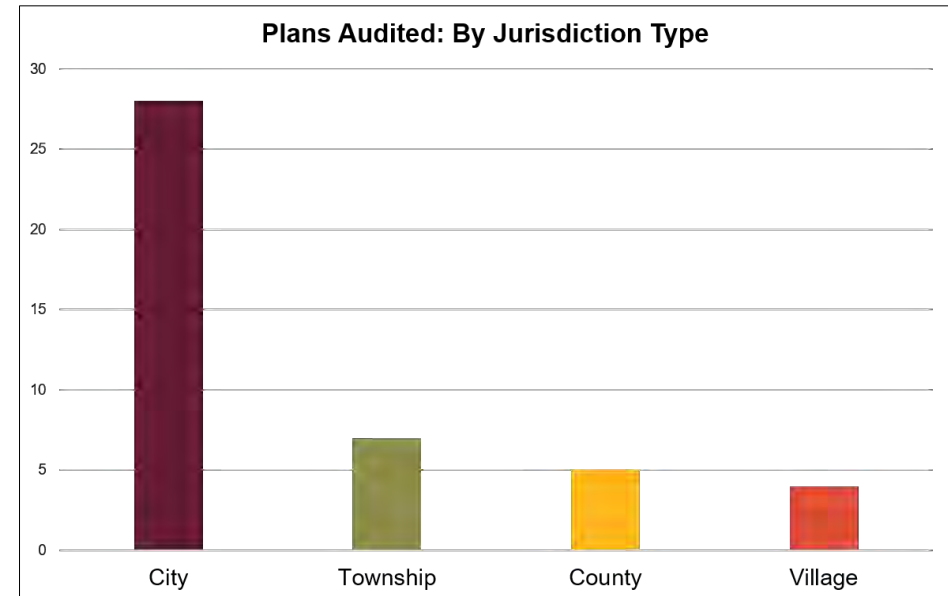

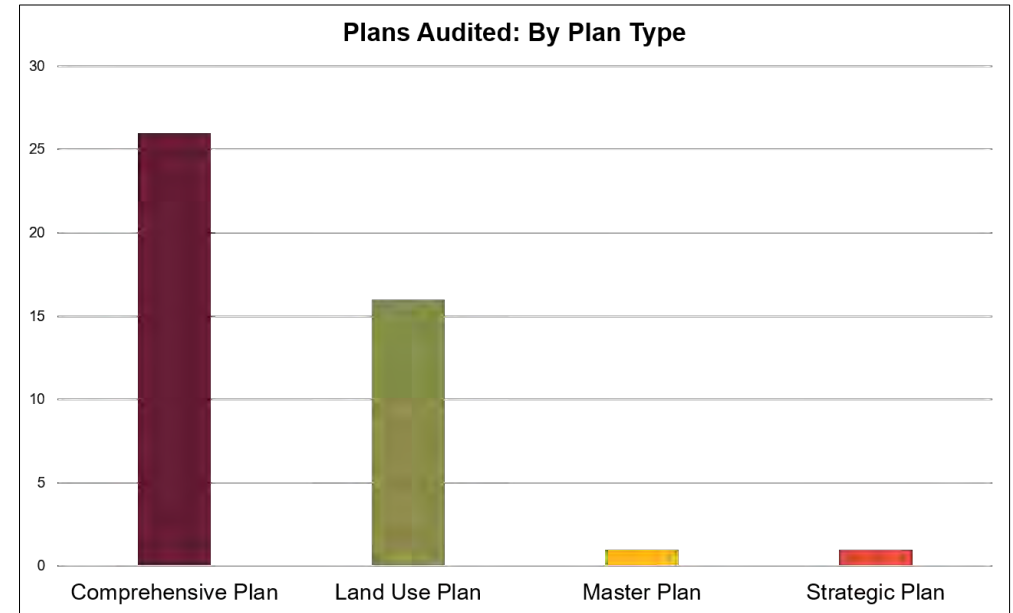

- Promote health in all plans and policies
- Convene and engage partners to improve environments which affect health
- Lead and/or support regional and local efforts aimed at providing healthier built environments

Local Plan Health Assessment

A systematic audit of adopted plan documents for incorporated communities which analyzed if, and to what extent, health was discussed within the plan.

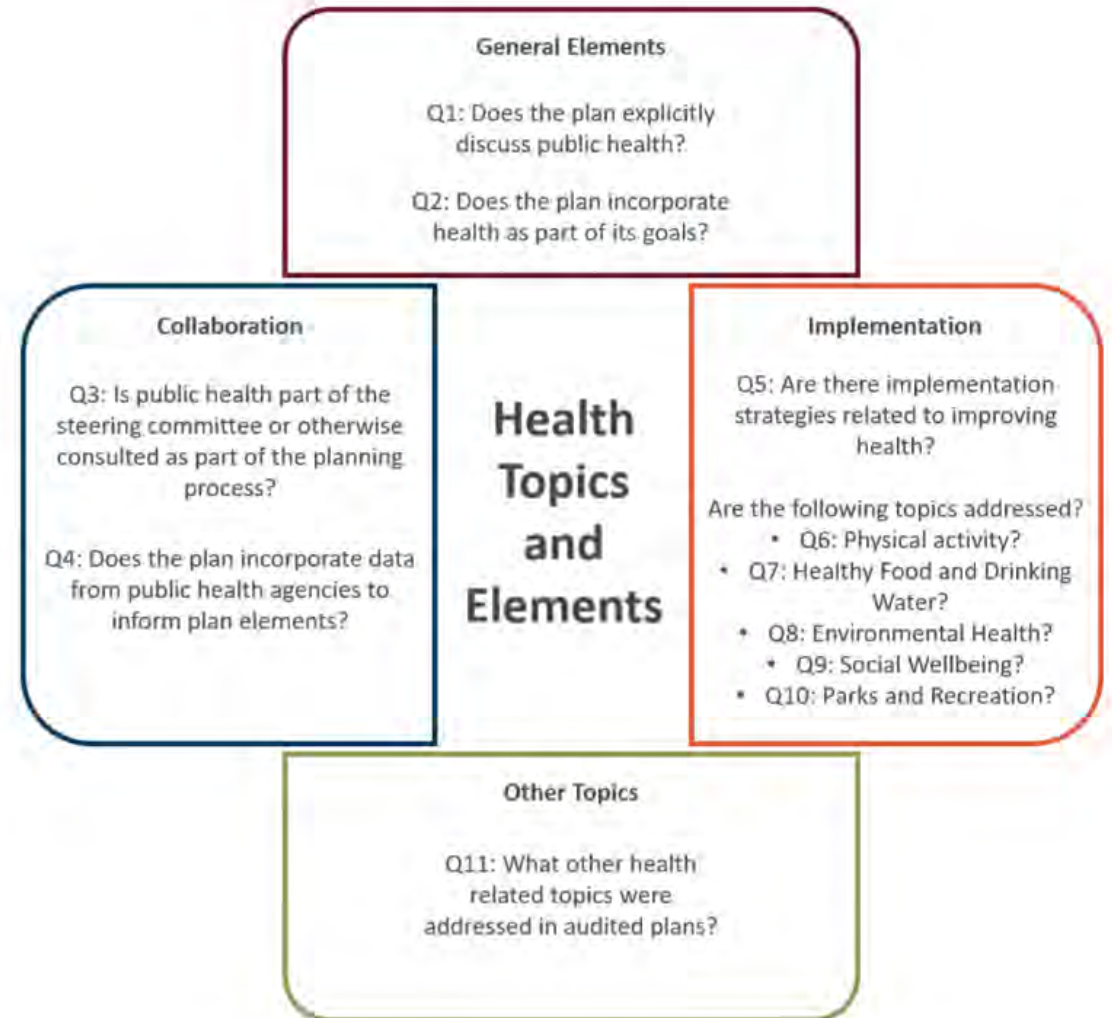

44 total plans were assessed from various communities in the Miami Valley. Each of these plans were analyzed for 11 different health related topics and elements.

Local Plan Health Assessment

Findings varied per plan, but in general, health was not an element of most of the audited plans. Only about ¼ of plans discussed health as a major plan component.

Q2: DOES THE PLAN INCORPORATE HEALTH AS PART OF ITS GOALS?

Thank you.
