Our Region has more people living in urban and suburban areas when compared to the U.S. and Ohio.

Population growth is mostly occurring outside of Montgomery County.

Between 1980 and 2010, Greene County gained the most population while northern Warren County experienced the highest percent change.

The Region’s population is less diverse, compared to the United States.

A diversity index shows the likelihood that two people, chosen at random from the same area, belong to different races or ethnic groups.

Our Region is reflective of the Midwest, which has been historically less diverse when compared to southern and coastal regions.
