

# MIAMI VALLEY LONG TERM DISASTER RECOVERY

The Miami Valley will build a comprehensive, coordinated long term disaster recovery system using the National Disaster Recovery Framework (NDRF) to serve all impacted counties. The NDRF provides guidance to enable recovery by defining recommended roles, responsibilities, coordination and planning among all jurisdictions. Based on decades of disaster response best practices, it focuses on how to restore, redevelop and revitalize the health, social, physical, economic, natural and environmental fabric of community and build resiliency for the future.
