Public Education & Program Outreach for Air Quality Awareness Program

Presented by Chanda Davis

Programs Funded by CMAQ

The Air Quality Awareness Program is funded by CMAQ. As outlined in the guidelines, the goal of CMAQ-funded public education and outreach programs is to educate the public, community leaders, and potential project sponsors about trip planning and transportation mode choices, traffic congestion, and air quality.

The **Congestion Mitigation and Air Quality Improvement Program or CMAQ** supports two important goals of the U.S. Department of Transportation: improving air quality and relieving congestion.

MVRPC uses a mix of advertising opportunities, community partnerships, and customer service to support these programs.

Actions to reduce Air Pollution

The **Air Quality Awareness Program** promotes actions to take to reduce air pollution. Actions like:

Running several errands in the same trip to reduce the miles you travel

Actions to reduce Air Pollution

Avoid idling while you wait or warming up your vehicle

- Idling wastes fuel without going anywhere and warming up your car is no longer needed for modern motors

Actions to reduce Air Pollution

Air Quality Alert

- The Regional Air Pollution Control Agency (RAPCA) monitors the air in the Miami Valley.
- If and when air pollution levels are forecasted to be high, an "**Air Quality Alert**" will be issued.
- These notices will be issued *the day before* air pollution levels are forecasted to be elevated.
- Poor air quality affects everyone; however, some individuals are susceptible to air pollutants, including children and adults who are active outdoors, older adults, and those with chronic respiratory diseases such as asthma. On AQA days, older adults, young children and those with breathing problems should modify their behavior and limit outdoor time.

Data flow

Air Quality System

AQS is the central database for all data collected by EPA, State, local and tribal air pollution control agencies from over a thousand monitors. AQS data is used to :

- Assess air quality
- **Used for attainment/non-attainment designations**
- Evaluate SIPS for Non-attainment areas
- Perform modeling for permit review analysis
- Prepare reports for Congress

The graphic is a vertical rectangular box with a green header and a white body. The header contains the text "Tools to Upload AQS Data" in white. The body contains three elements: a logo for "Environmental Information exchange Network" with "exchange" in green and "Network" in black; a blue sphere with "AQS" in yellow; and the text "Launch Web Application" in blue.

AQI Basics for Ozone and Particle Pollution

Daily AQI Color	Levels of Concern	Values of Index	Description of Air Quality
Green	Good	0 to 50	Air quality is satisfactory, and air pollution poses little or no risk.
Yellow	Moderate	51 to 100	Air quality is acceptable. However, there may be a risk for some people, particularly those who are unusually sensitive to air pollution.
Orange	Unhealthy for Sensitive Groups	101 to 150	Members of sensitive groups may experience health effects. The general public is less likely to be affected.
Red	Unhealthy	151 to 200	Some members of the general public may experience health effects; members of sensitive groups may experience more serious health effects.
Purple	Very Unhealthy	201 to 300	Health alert: The risk of health effects is increased for everyone.
Maroon	Hazardous	301 and higher	Health warning of emergency conditions: everyone is more likely to be affected.

Miami Valley Regional Housing Study Releases Map Gallery as Part of its Data Hub

MVRPC is pleased to share the launch of a new suite of interactive maps as part of the Miami Valley Regional Housing Study. Published as part of its Data Hub, the [Map Gallery](#) features a total of fifty maps, grouped in three sub-topics: Households and Demographics; Supply and Market Conditions; and Affordability and Stability.

The map gallery is the **second published component of the Miami Valley Regional Housing Study's Data Hub**, which serves as a central source for data, maps, and insights. These maps explore key housing indicators at a regional and local level, complementing the previously published [Data Dashboards](#).

MIAMI VALLEY
REGIONAL HOUSING STUDY

- Identify** critical housing issues
- Investigate** housing issues in depth
- Inform** local housing policies and programs

The [Miami Valley Regional Housing Study](#) was launched in February 2025 to increase awareness of current housing issues and provide tools and best practices resources. The Miami Valley Regional Housing Study consists of three main interrelated components: Data Hub; Issue Briefs; and Resource Hub. These components are designed to inform housing policies and programs at the local level by providing data and information.

To date, the Housing Study has released the Housing Mobility & Accessibility Assessment, published a Resource Hub, and facilitated three Youth Group Housing Workshops.

For questions or more information on the Miami Valley Housing Study, contact Martin Kim, Director of Community and Regional Planning at mkim@mvrpc.org.

MVRPC Hosts its Third Youth Group Housing Workshop

MVRPC hosted its third informative workshop on the topic of Youth Group Housing on Tuesday, April 7th at the Montgomery County Employment Opportunities Center. This workshop was a chance to continue to discuss and learn the impacts and implications Group Housing for Youth has on community service providers, notably Schools, Family and Social Services, and Health Services.

A total of 43 attendees representing government, nonprofit, and private sectors in the fields of education, medical professionals, children’s services, and planning were in attendance. In addition, several group home operators and the head of the group homes association attended the workshop.

The workshop included a brief presentation given by Ms. Kathryn Youra Polk of MVRPC to provide an overview of the issues, background context and data resources on the subject, with Ms. Emily Crow (City of Dayton) and Ms. Shannon Meadows (Harrison Township) giving updates on both the status of their youth group home moratoriums and how each jurisdiction. Following the review presentation, a panel of community service providers that included Ms. Kaylyn Drodge (ADAMHS), Ms. Courtney Patel (Daybreak), Dr. Kelly Blankenship (Dayton Childrens Hospital), Dr. David Lawrence (Dayton Public Schools), Ms. Sarah Hackenbracht (Greater Dayton Area Hospital Association), and Ms. Jennie Cole (MCDJFS - Children Services) all shared their experiences and relationships interacting with youth group housing in their line of work.

Attendees came away with a further understanding of the complex issues, barriers and workarounds Youth Group Housing concentration has within community service fields and what solutions they’re implementing to better improve outcomes.

To find additional information about the workshop, please visit MVRPC’s [Youth Group Housing](#) page. The Youth Group Housing Workshop is hosted as part of the [Miami Valley Regional Housing Study](#) launched in February 2025 to increase awareness of current housing issues and provide tools and best practices resources.

For more information regarding the Miami Valley Regional Housing Study, contact Martin Kim, MVRPC’s Director of Community and Regional Planning, at mkim@mvrpc.org.

Public Health Perspective Added to PLAN4Health’s Healthy Communities Needs Assessment

MVRPC [PLAN4Health – Miami Valley](#) Initiative promotes cross-sector collaboration between planners and public health professionals to foster innovative community design and integration of public health into the planning process.

Local community planners shared how they plan for public health in their work as part of the previously published [Healthy Communities Needs Assessment](#). Now, MVRPC has released the [Planning Collaboration: Public Health Perspective](#), which served as an equivalent for public health professionals to share how they see collaboration with local planners in the Miami Valley.

The Public Health Perspective covers major topic areas such as communication, data usage, resources, and ideas for collaboration with planners. In addition, it features comparisons between responses from planners and public health professional, highlighting areas where both sectors are in alignment, and areas where both have differing perspectives.

MVRPC’s [PLAN4Health – Miami Valley](#) Initiative was launched in the Spring of 2021 to explore how planning can impact health outcomes. The PLAN4Health - Miami Valley Initiative is a multi-year effort with a focus on projects and programs intended to:

- Promote and advocate for “Health in All Plans and Policies”
- Convene and engage partners to improve conditions that are known to be key determinants of health
- Advance planning efforts aimed at creating conditions for healthy people and communities

For questions or to learn more about the [PLAN4Health – Miami Valley](#) Initiative, contact Martin Kim, MVRPC’s Director of Community and Regional Planning, at mkim@mvrpc.org.
