

MIAMI VALLEY LONG TERM DISASTER RECOVERY Impacted Jurisdictions Meeting

November 12, 2021 9:30 – 11:00 AM

****MEETING LOCATION**** 1401 S. Main Street First Floor Conference Room

1. Welcome & Introductions Brian O. Martin, MVRPC

2. Community Recovery Project Discussion All

There are three stages of recovery: Immediate Response, Individual Recovery and Community Recovery. With a 95% rate of individual recovery, we will soon end that phase and transition to the Community Recovery. As we do this, we need the leaders of impacted communities to identify the tornado impacted needs that remain and discuss how we may be able to secure the resources to resolve those concerns.

We ask that each community bring forward a list of remaining needs in your community that are disaster related and would be potential projects seeking support from the Tornado Relief Fund at The Dayton Foundation. The types of projects which could be considered include, but are not limited to:

- Matching funds to leverage grants or other funding opportunities
- Restoration/rebuilding of public facilities or spaces that sustained direct disaster impact in order to return them to full use
- Resolution of “no progress” properties as reflected in the Disaster Recovery Dashboards, whether this means acquisition with transfer to public agency, then repair or demolition
- Addressing the blighted multi-family units with disaster impact
- Mitigation, Preparedness and Resiliency needs in order to ensure preparedness and protection of the public

3. Community Recovery Update Stacy Schweikhart, MVRPC

4. Individual Recovery Update Laura Mercer, MVLTRG

5. Other Updates All

6. Adjourn

Next Meeting: Thursday, February 10, 2021 Format / Location TBD
