

MVRPC
SERVICES

Geographic Information System

GIS uses geography as a means of organizing and presenting information. It helps us visualize, analyze, and interpret data to understand relationships, patterns, and trends.

The Miami Valley Regional Planning Commission (MVRPC) can work with your community or organization to enhance your GIS capabilities, no matter what your experience.

GIS SUPPORT

MVRPC wants to partner with you to:

- update and create** mapping layers (zoning, land use, public safety, built and natural features, and others)
- maintain** mapping layers so you can better manage your data
- publish** information to the web to increase services and accessibility
- train** your staff on using mapping software like ArcGIS and ArcGIS Online

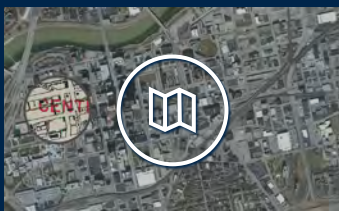

REGIONAL COORDINATION

Bringing GIS professionals together to:

- prioritize** GIS projects and initiatives
- create and share** GIS datasets to expand the availability of layers
- collaborate** on mapping applications and develop new partnerships
- develop** integrated web services to allow access from the web

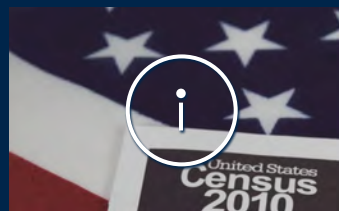

RESOURCES

Highlighted below are a few of the MVRPC resources available now at mvrpc.maps.arcgis.com.

MAP GALLERY

online gallery of transportation, environment, land use, Census, boundaries and more

CENSUS DATA CENTER

access to Census data and maps

WEB TELUS

Transportation Improvement Program (TIP) project tracker

TRAFFIC COUNTER

database of regional traffic counts
