The Regional Profiles provide insight on where the Miami Valley Region stands by providing data, information, and maps on a variety of subjects.

Launched in the summer of 2016, the Regional Profiles touch on many important aspects of our Region, such as its infrastructure, environment, economy, and social characteristics. MVRPC has published eight individual regional profiles to date and the topics range from our Region’s transportation system to workforce to equity.

Each profile has two products, a print version and a dynamic web-based infographic suitable for both desktop and mobile devices. Interactive web maps are also available to present detailed data for different parts of the Region. Links to these maps are included in the profiles.

Established in 1964, the Miami Valley Regional Planning Commission promotes collaboration among communities, stakeholders, and residents to advance regional priorities. MVRPC is a forum and resource where the Board of Directors identifies priorities and develops public policy and collaborative strategies to improve quality of life throughout the Miami Valley Region. MVRPC performs various regional planning activities, including air quality, water quality, transportation, land use, research and GIS. As the designated Metropolitan Planning Organization (MPO), MVRPC is responsible for transportation planning in Greene, Miami and Montgomery Counties and parts of northern Warren County. MVRPC’s areawide water quality planning designation encompasses five (5) counties: Darke, Preble plus the three MPO counties.

Our Region’s economy is comprised of businesses and jobs of diverse industry sectors. Influenced largely by the national economy, the Region has experienced both dynamic industry sector growth and decline over the last 12 years. This profile looks at the components of regional economic activity between 2004 and 2016, with a special focus on the top sectors of the Region: government, health care, and manufacturing.

The Miami Valley Region is becoming more diverse and it is important to understand how it’s changing. This profile looks at our Region’s diversity in terms of population growth, race, ethnicity, age, religion, foreign-born population, birth rates, and in-and-out migration. The profile presents an analysis of diversity at the regional and sub-regional level, including historical trends from 1980 to 2010, and projections for 2040.

Pollution does not follow political boundaries; nature has different borders. Assets like the Great Miami Buried Valley Aquifer span county lines. We share in the benefits of improving air quality in our area. When we all share the same environmental resources, we share responsibility for keeping it safe. This profile investigates the quality of the Miami Valley’s air, water, and land with several lenses.

Understanding and addressing the issues of equity is essential to building a more resilient and sustainable Region. This profile provides insights on the issue of equity in the Miami Valley Region. It examines equity in terms of places, people, and their access to opportunity. The profile presents an analysis of equity at the regional and sub-regional level, including historical trends from 1980 to 2010, and a comprehensive look at equity for 2014.

The Miami Valley Region provides a wide range of affordable housing options. This profile looks at housing by household composition, home ownership, vacancy rates, housing type, development trends, construction costs, building permit trends, and housing values and sale prices. The profile presents an analysis of housing at the regional and sub-regional level, including historical trends from 1980 to 2010.

Our Region has high-quality, recreational open spaces that positively impact our health, environment, and quality of life. This profile looks at different types of recreational open space such as general outdoor recreation areas, natural environment protection areas, and natural environment recreation areas at the regional and county level.

Vacancy has been a concern for many communities in the Miami Valley, especially since the Great Recession. While the overall vacancy rate has improved, we have not yet fully recovered, and the results have been uneven across our Region. This profile summarizes analysis and mapping of vacancy, at both the regional and sub-regional level, with a focus on trends, timelines, and residential and business vacancy patterns.

The Miami Valley Region’s workforce is made up of people with diverse occupations. Influenced by the state and national economy, the Region has experienced dynamic occupational growth and decline over the last 12 years. This profile looks at our Region’s workforce, and associated occupations, between 2004 and 2016.
